DESIGNER PERSPECTIVE ••• MATT GIARDINA

ELEMENTS
OF SOLACE

“When I asked my client to use one word to describe what they wanted from a bathroom, their word was “solace”. Together we came up with a bright palette to evoke feelings of cleanliness and relaxation. We pulled traditional cabinetry elements from the rest of the home into the bathroom for cohesion. Now, the end of their day can be spent soaking away any stress in a warm bath.”

COOKS PARADISE

“Our client was a young, bustling family that needed a practical workspace that could keep the kids busy while preparing dinner. We discussed their love for certain traditional elements such as crown molding and their desire to bring out the unique brick arch as a focal point. To help brighten the space, we picked out a custom blue for the island that accented other kitchen features. We enjoyed creating this cooks paradise together with plenty of storage and organizational options.”

50 | CELEBRATING 50 YEARS IN BUSINESS |

It was 1968 when, from his small garage in the south central Pennsylvania farmland, John Achey turned his hobby of cabinetmaking into the pursuit of a dream. It was named, quite simply, for the styles they made — plain ones and fancy ones. It was from those humble beginnings that Plain & Fancy was born.

Now located right in the heart of Pennsylvania Dutch country, Plain & Fancy continues its tradition of exceptional design and craftsmanship. Our “extended family” still pours heart and soul into building the kind of custom cabinetry John Achey felt was worth making nearly five decades ago.

THINK BEYOND THE KITCHEN

EVERY ROOM IS A BLANK CANVAS
